

Dental Medical Clinic Web Project

Author: Esther IMANISHIMWE UWERA

Date:15, April 2025

1. Introduction

This project is a responsive website for a fictional dental medical clinic. The goal is to create an informative, user-friendly platform where patients can learn about the clinic, its services, and book appointment.

2. Features of the Website

- Home Page: Welcome message and introduction to the clinic.
- General Dentistry services Page
- Cosmetics Dentistry services Page
- Contact Page: Location, phone number, email, and a contact form where can book appointment online

3. Technologies Used

- HTML for structure
- CSS for styling

4. Conclusion

The Dental Medical Clinic website is designed to provide basic information about the clinic and make it easy for patients to find services and contact the clinic. Future improvements could include a full backend system for appointment management and patient records.
